

Scarlet RF

How does Scarlet RF treatment work?

Scarlet RF was developed to overcome the limitations of conventional radiofrequency (RF) therapies. The Scarlet RF works by precisely delivering radiofrequency energy to the lower layers of the dermis using microneedles.

Scarlet RF treatments stimulate collagen production and reshape skin elastic fibers gradually and continuously, restoring skin firmness and tone. Just a few days after the treatment, the fine lines, wrinkles, texture and firmness of the skin are significantly improved. This skin tightening procedure is also used to reduce acne scars, pore size, drooping eyelids, sagging skin under the eyes etc.

When are the results visible?

The results are visible a few days after the first session, but the complete effect is observed around 8-12 weeks after treatment.

The number of total sessions needed depends on the problem and its extent. Generally, 3-5 sessions are required, with an interval of one month between sessions. The treatment can be carried out all year round, even during the summer.

Indications for Scarlet RF treatment:

- Acne scars
- Injury scars
- Skin relaxation
- Wrinkles
- Periphthalmic (eyes) and perioral (mouth) wrinkles
- Relaxation of skin tissue in the upper and lower eyelid
- Dark circles under the eyes
- Rough skin texture and open pores
- Dull and tired skin
- Photoaging / discolorations
- Stretch marks and scars

What are the benefits of a Scarlet RF treatment?

- Skin rejuvenation
- Volumetric straightening
- Straightening and tightening of the skin
- Short recovery time
- Suitable for all skin types, even very thin, sensitive skin types
- Suitable for all year round
- It simultaneously treats multiple skin problems such as: discoloration, scars, loose skin, wrinkles, stretch marks, etc.

How long does it take to recover?

Immediately after treatment there is a slight irritation and local swelling, but it subsides after a few hours. There may be mild irritation and a feeling of dryness for 24-48 hours after treatment, which will gradually subside with the help of special moisturizing and rejuvenating products.

Just a few days after the treatment, a fresh, glowing and rejuvenated skin will be revealed.

Are there any side effects or contraindications?

Strong chemical exfoliation, laser hair removal or any other sublimation treatment is prohibited for at least 10 days before and after the treatment.

Can Scarlet RF treatment be combined with other treatments?

Yes, it can be combined with other treatments at separate intervals or at the same time for even better and faster results, such as Mesotherapy, PRP, HIFU, Accent RF, Carboxytherapy etc.

** The Scarlet RF is FDA approved.*
