

CO2 Fractional Laser

The CO2 Fractional Laser is the most traditional Laser for dermatological use and is used for skin regeneration, discolorations but also for cauterization, sublimation and incisions.

The CO2 Fractional Laser we have, is the revolution in Full Skin Resurfacing as it requires just a few minutes to complete a session without carbon effect.

Clinical Results

What is the CO2 Fractional Laser;

The CO2 Fractional Laser is the new generation of lasers for regeneration and offers impressive results in the most ideal way. In particular, the CO2 Fractional Laser causes sophisticated micro-injuries to the skin from time to time, thus accelerating the body's regeneration process. The fact that minor injuries occur from time to time has minimized recovery times, but without affecting the effectiveness of the method.

How many applications are needed?

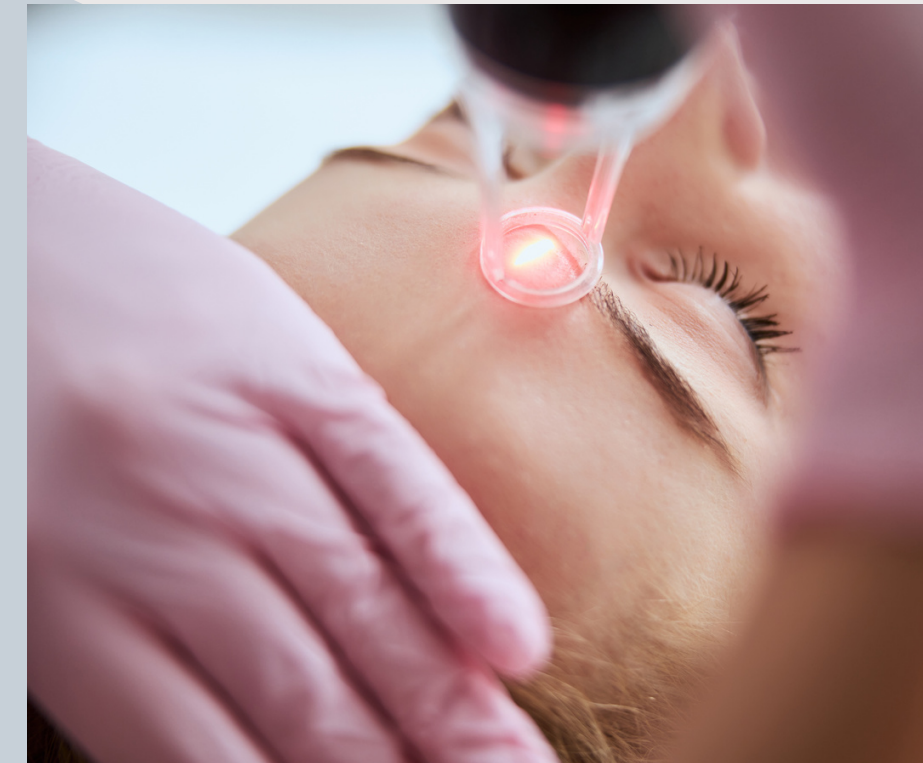

Usually, no more than 3 to 4 applications are needed, although this has to do with the severity of the problem that the specialist has to deal with.

Is the process time consuming?

The CO2 Fractional Laser that exists in our practice, is the fastest laser that exists in the world market. In particular, it operates at five times the speed of any other. Thus, the total application time on a person does not exceed 5 to 6 minutes.

Is the procedure painful?

The application with the fractional CO2 laser is almost painless and most of the time does not even need a local anesthetic.

What should I watch out for after applications?

After each application, direct exposure to sunlight should be avoided and sunscreen with a high protection index and topical preparations should definitely be used according to the instructions of the specialist.

In which areas of the body can it be applied?

In addition to the face, neck, décolleté and arms, the CO2 Fractional Laser is applied to any part of the body where there is a problem and the specific method is indicated (eg stretch marks).

Why choose the Fractional CO2 laser method?

- Because it is the most modern and innovative method of regeneration in the world.
- Because it is the only method that gives visible and immediate results with a minimum number of sessions.
- Because it is the only method that gives solutions to really difficult skin problems (eg discolorations).
- Because it is the safest method, without the need for the candidate to be cut off from their his daily activities ("lunch break treatment").

In which cases does the Fractional CO2 laser apply?

The fractional CO 2 laser is recommended for:

- Spectacular regeneration
- Elimination of acne scars
- Elimination of discolorations
- Spectacular reduction of streaks
- Elimination of fine wrinkles
- Elimination of photoaging
